Arent Inc.

Completion of Overseas Subsidiary Establishments in the United States and Spain

— Strengthening Global Expansion and Local Support Capabilities —

Arent Inc. (Headquarters: Minato-ku, Tokyo; CEO: Hiroki Kamobayashi) is pleased to announce that the establishment of its overseas subsidiaries in the United States and Spain has been completed.

These new subsidiaries were established to further strengthen PlantStream's global business operations, including product deployment, customer support, and partner collaboration.

The details of the newly established companies are as follows:

- **Arent Solutions Inc.**
Houston, United States
Established: October 1, 2025
- **Arent Software S.A.**
Madrid, Spain
Established: November 19, 2025

Both entities have been established as wholly owned subsidiaries of Arent Inc. and will serve as key operational bases for PlantStream's global business development.

Background and Purpose

PlantStream is a 3D CAD software specialized in automating plant piping design, jointly developed with Chiyoda Corporation and launched in 2020.

By transforming the conventional two-hour-per-line piping design process into an intuitive workflow capable of designing up to 1,000 lines per minute, the software has been adopted by major engineering companies both in Japan and abroad.

Today, it is utilized by global EPC firms including Technip Energies, with implementations in approximately 16 countries.

In response to this growing global demand, the establishment of these new entities enables:

- **Faster response to global clients**
- **Localized implementation and technical support**
- **Stronger sales and partner channel collaboration**
- **A solid foundation for long-term global revenue growth**

Future Outlook

Through enhanced sales and support operations in the U.S. and Europe, PlantStream aims to deliver its products more quickly and flexibly than ever before.

These new offices bring us closer to our global customers, enabling more direct collaboration and tailored solutions to meet on-site needs.

PlantStream will continue to enhance its products and services to better serve customers worldwide. We appreciate your continued interest in PlantStream.
